ADRIAN JUSTIN J. SAN DIEGO

AUTOMATION & SOFTWARE DEVELOPER • FULL-STACK WEB (PHP / JS / MYSQL) • WORKFLOW & API ENGINEERING

Rizal, Philippines • (+63) 918-743-6765 • adrian002bca@gmail.com • linkedin.com/in/adrian-justin-san-diego • Portfolio: adrian-sandiego.vercel.app

PROFESSIONAL SUMMARY

BS Information Systems graduate (Best Capstone Awardee) with hands-on production experience developing full-stack web applications (PHP, JavaScript, MySQL, CodeIgniter 4) and architecting **25+ automated backend data pipelines and scrapers** using self-hosted n8n on Hostinger, custom JavaScript Code nodes, RESTful APIs, webhooks, and LLM APIs (xAI Grok). Experienced in relational database design, Cloudflare 403 mitigation, DNS incident recovery, O(1) in-memory deduplication, and agile Jira Kanban sprint delivery with live customer-facing systems deployed on Vercel and Hostinger.

TECHNICAL SKILLS

Programming & Web Development: JavaScript (ES6+ / Node.js), PHP (OOP, MVC, CodeIgniter 4), SQL (MySQL), HTML5, CSS3, Bootstrap 5, Regular Expressions (RegEx), PowerShell scripting
Workflow Automation & APIs: n8n (Self-Hosted on Hostinger, 25+ active pipelines), RESTful API Design, Webhooks, JSON Schema Transformation, HTTP Request Handling, Cron Scheduling, Make fundamentals
AI & LLM Integrations: xAI (Grok API), Prompt Engineering, Structured JSON Schema Extraction, AI Data Normalization, Notion AI
Databases & Storage: MySQL & MariaDB (Relational Schema Design, Normalization, CRUD Operations, Indexing, Backup & Restoration), Google Sheets Automation (REST API & batchUpdate), Data Deduplication Algorithms, Advanced Excel
Platforms, Tools & SDLC: Vercel, Git, GitHub, Jira (Agile/Kanban), Hostinger, Apache, XAMPP, Lovable.dev, Kit (ConvertKit), Google Analytics 4 (GA4), WordPress, Elementor, VS Code, SDLC
IT Systems & Networking: Windows Administration, Workstation Setup, LAN/Wi-Fi Setup, IP Addressing, Computer Systems Servicing (TESDA NC II)

PROFESSIONAL EXPERIENCE

Junior Automation & Technical Operations Specialist (Contract) — August 2026 – Present
EdTech & Career Accelerator Startup | Remote (WFH)

- **Automated Data Pipelines (n8n):** Engineered, upgraded, and actively maintain 25+ production automated backend workflows and scrapers on a self-hosted n8n instance on Hostinger running on recurring 2–3 hour cycles.
- **RESTful APIs & Anti-Blocking:** Diagnosed and resolved live Cloudflare 403 blocks, HTTP 406/429 errors, and DNS failures; architected RESTful API integrations (xAI Grok LLM, Google Sheets API `batchUpdate`, GA4, Kit API) with custom browser headers, payload batching, and token minimization.
- **Custom JavaScript & Deduplication:** Authored custom JavaScript Code nodes and strict word-boundary RegEx pattern filters implementing O(1) in-memory `Set()` and multi-field fingerprint deduplication with intra-batch locks, guaranteeing 0 duplicate entries across consecutive runs.
- **Stale Pipeline Recovery & Data Hygiene:** Audited and restored 5 stale ingestion pipelines (30+ days inactive), resolving broken links, 22-column Grok JSON normalization, Google Sheets API `batchUpdate` backfills across 1,300+ rows, and frontend board filter alignment.
- **Automated Document Ingestion:** Architected automated student intake pipeline in n8n featuring Google Sheets logging and dynamic branded HTML-to-PDF rendering.
- **Agile QA & Sprint Delivery:** Executed daily end-to-end integration smoke tests, payload validation, and GA4 analytics reporting verifying data integrity from raw endpoints to central databases; closed 50+ technical tickets within an agile Jira Kanban sprint framework.

IT Systems & Support Developer — May 2026 – August 2026
Apptrade Inc. | Taytay, Rizal, Philippines

- Developed and maintained full-stack locally hosted **PHP & MySQL retail Point-of-Sale (POS)** and inventory management systems deployed on-site through XAMPP, alongside an online e-commerce web platform.
- Implemented core transactional modules: barcode scanning, session-based cart and checkout workflows, automated receipt printing, dynamic discount calculation, and customer-facing displays.
- Designed relational database schemas, optimized transactional SQL queries, and performed routine MySQL backups, data restorations, and application debugging.
- Provided IT infrastructure support across office hardware, workstations, Wi-Fi/LAN connections, IP addressing, routers, and CCTV/DVR security systems.

IT Intern – Web & System Developer — January 2026 – March 2026
Optimum Brands Inc. (OBI) | Pasig City, Philippines

- Engineered the interactive browser-based **OBI Room Visualizer** (deployed live on official `obiasia.com`), Quotation System, and Payment-Budget System utilizing PHP, JavaScript, HTML5, CSS3, SQL, and relational MySQL databases.
- Built dynamic room selection, interactive texture preview, canvas rotation, and image rendering features; assisted senior staff with database indexing, cross-browser compatibility testing, and UI enhancements.

PROJECTS & LIVE PORTFOLIO

Automated Data Ingestion & AI Pipeline — *Self-Hosted n8n, xAI Grok API, JavaScript, REST APIs, Google Sheets*
Architected an end-to-end automated pipeline collecting public recruitment data, normalizing fields via custom JavaScript, classifying relevance via Grok API, deduplicating records, and routing sanitized data to central tables and live web boards.

QRYPT: Student Attendance & Visitor Management System (Best Capstone Awardee) — *PHP, MySQL, QR Authentication, JavaScript, HTML5/CSS3*
Full-stack academic attendance system featuring dynamic QR code generation, camera scanning decoding, real-time attendance & visitor logging, role-based administrative dashboards, and audit reports. Live Demo: qrypt.great-site.net

Apptrade E-Commerce Store & On-Site POS System — *PHP, MySQL, JavaScript, Bootstrap 5, XAMPP*
Co-developed an on-site retail POS deployed via XAMPP for in-store transactions, alongside a deployed e-commerce storefront with product catalog browsing, session-based cart management, checkout workflows, and administrative inventory controls. Live Store Demo: sampleappweb.great-site.net

OBI Interactive Room Visualizer — *PHP, JavaScript (Canvas API), HTML5/CSS3, MySQL*
Interactive production web application enabling enterprise customers to preview flooring products in realistic room layouts, manipulate texture angles, and export customized design sheets. Live on obiasia.com | Interactive Demo: obi-roomvisualizer.great-site.net

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Systems (BSIS) — Trent Information First Technical Career Institute, Taytay, Rizal — Graduated: May 2026

• **Computer Systems Servicing NC II** – TESDA, 2024 | • **Outstanding / Best Capstone Award** (QRYPT System) | • **Academic Loyalty Award**
